

Attention Neuromodulation Product Vendors

Announcing a New Online Database of Neuromodulation Products

Neurotech Reports, the publisher of *Neurotech Business Report*, in conjunction with the International Neuromodulation Society and Neurotech Network, is pleased to announce the introduction of our online database of neuromodulation products. This exclusive and comprehensive service will be available to members of the International Neuromodulation Society, members of Neurotech Network, and subscribers to Neurotech Reports.

Now, for the first time, vendors of neuro-modulation products can reach all three critical components of the marketplace: clinicians via the INS website, consumers and end-users through the Neurotech Network website, and manufacturers through the Neurotech Reports website.

Each query offers detailed information on neuromodulation products currently on the market worldwide or in clinical trials, including information on vendor company, product description, regulatory status, and reimbursement status.

We are now accepting reservations for sponsorships. To reserve your place, contact James Cavuoto at Neurotech Reports, 415 546 1259, or David Groves at 818 929 7171. The database is scheduled to go live in March 2010.

Product condition: Chronic pain

St. JUDE MEDICAL
Neurostimulation Division
6901 Preston Road
Minnetonka, MN 55345
