# 2022

This fifth annual meeting represents the premier management and investment conference for the new and emerging bioelectronic medicine industry. Attendees will have an exclusive opportunity to interact with some of the key leaders driving this field forward. The schedule of presentations and panel discussions features a host of experts with a wealth of information on the neuroscience industry and the investment community.

Sessions will cover a range of technologies and indications for bioelectronic medicine, including applications in cardiovascular medicine, inflammation, gastrointestinal disorders, and many other clinical specialties. Attendees will hear from some of the leading researchers and entrepreneurs developing clinically and commercially promising products such as implanted vagus nerve stimulation systems to treat hypertension, and surface stimulation devices to treat a range of disorders.

The conference is produced by Neurotech Reports, the publisher of the *Neurotech Business Report* and *BioElectRx Business Report* newsletters, and the leading market intelligence firm covering the neurotechnology and bioelectronic medicine industries. We are currently recruiting speakers and presenters for the 2022 event. Contact us for more information if you are interested in participating as an Entrepreneur Presenter.
