Technologies Covered

Neuromodulation
Neuroprosthetics
Deep Brain Stimulation
Neurorehabilitation
Brain Sensing Technologies
Consumer Neurotech

Issues Discussed

Obtaining Financing
Partnering Opportunities
Reimbursement Outlook
Relationships with Bio/Pharma Firms
Marketing and Distribution
Developing Clinician Support

Featured Entrepreneurs

Spinally Medical, Warsaw, Poland
Developer of ultrathin SCS leads designed for intrathecal implantation.

Backstop Neural, Dallas, TX.
Manufacturer of novel SCS systems featuring thin-film electrodes.

InflammaSense, San Diego, CA.
Manufacturer of diagnostic and therapeutic technologies for systemic disorders.

Who Should Attend

- Neurotechnology Executives
- Venture Capital Professionals
- Entrepreneurs
- Healthcare Professionals
- Neural Engineering Researchers

This two-day conference, with options for on-site or remote videoconference participation, offers an exclusive forum for neurotechnology executives and entrepreneurs to interact with investors, technologists, and potential partners who are actively working to grow this new and exciting industry. The schedule of presentations and panel discussions features a host of experts with a wealth of information on the neurotechnology industry and the investment community.

Sessions will cover a range of technologies and market segments in the neuro space, including neuromodulation, neuroprosthetics, neurosensing, and neurorehabilitation. The first day of the conference features sessions on the market for neuromodulation devices, including an in-depth overview of the industry by Neurotech Reports editor James Cavuoto. Executives from several startup and early stage neurotechnology companies will take part in an Entrepreneur Panel. Keynote speaker this year is Raymond Cohen, CEO of Axonics, Inc. The conference features sessions devoted to peripheral nerve stimulation, consumer neurotech, brain computer interfaces, and reimbursement issues.
